- Empathy
- Adaptability

Projects

02/2025 – present

Portfolio Website [🔗](#)

Personal Project

- Built and deployed a personal portfolio website to showcase projects, skills, and professional background.
- Utilized GitHub Pages for deployment and version control with Git.
- Ensured responsive design for both desktop and mobile devices with clean UI/UX.
- **Tech Stack:** HTML, CSS, JavaScript, GitHub Pages

08/2024 – 05/2025

UniConnect [🔗](#)

HIT 200 (Group Project)

- Developed a full-stack student platform for streamlining feedback process within a university environment
- Implemented features including role-based user authentication, database management, and a responsive user interface.
- Integrated Firebase for real-time data handling and authentication, and used Firestore as the NoSQL backend.
- Utilized Next.js and Tailwind CSS for building a fast, scalable, and responsive frontend with a clean UI.
- Applied Git for version control and team collaboration, ensuring smooth code management across multiple contributors.
- **Tech Stack:** Next.js, TypeScript, Firebase, Firestore, Tailwind CSS, Git

11/2024 – 11/2024	Zim Osaka Expo Website <i>Hackathon Challenge</i> <ul style="list-style-type: none"> Collaborated in a hackathon to develop a promotional website for the Zimbabwe Osaka Expo 2025. Designed and implemented a fully responsive, mobile-friendly website showcasing event details, objectives, and real-time weather integration. Integrated the Gemini AI API to dynamically display Expo-related content and the Weather API to provide live environmental updates for visitors. Focused on accessibility, SEO optimization, and performance enhancements. Tech Stack: HTML, CSS, JavaScript, Gemini API, Weather API
-------------------	--
